INTRODUCTION

ArtHouseOnline is a digital learning platform in the field of art and music. “ArtHouseOnline” is a website that can be used by everyone, easily. There are so many course options on the website such as dance, painting, music; and there are subbranches for them too. For example; for a user who chooses dance course, there will be nine kinds of dance he or she can choose.

GOALS

- Giving people a hobby.
- Generalizing art because it helps people.
- Enabling people to improve themselves during the pandemic.
- Enabling teachers to reach more students.

Target Customers

teachers, students, anyone interested in art and music are our target customers

Overall Functionalities of the Project

“ArtHouseOnline” is a website that can be used by everyone, easily. There are so many course options on the website such as dance, painting, music; and there are subbranches for them too. For example; for a user who chooses dance course, there will be nine kinds of dance he or she can choose. To be able to do this, user has to sign up our website first. Then, the user can search courses or instructors and find what he/she wants. User can watch a preview for free. The course can be free or paid-for. It is up to the instructor. If the course is paid-for, user can pay by credit card safely, and get the whole course videos forever. Also, if user wants to take the course later, he/she can add the course to “favorites” not to forget it.

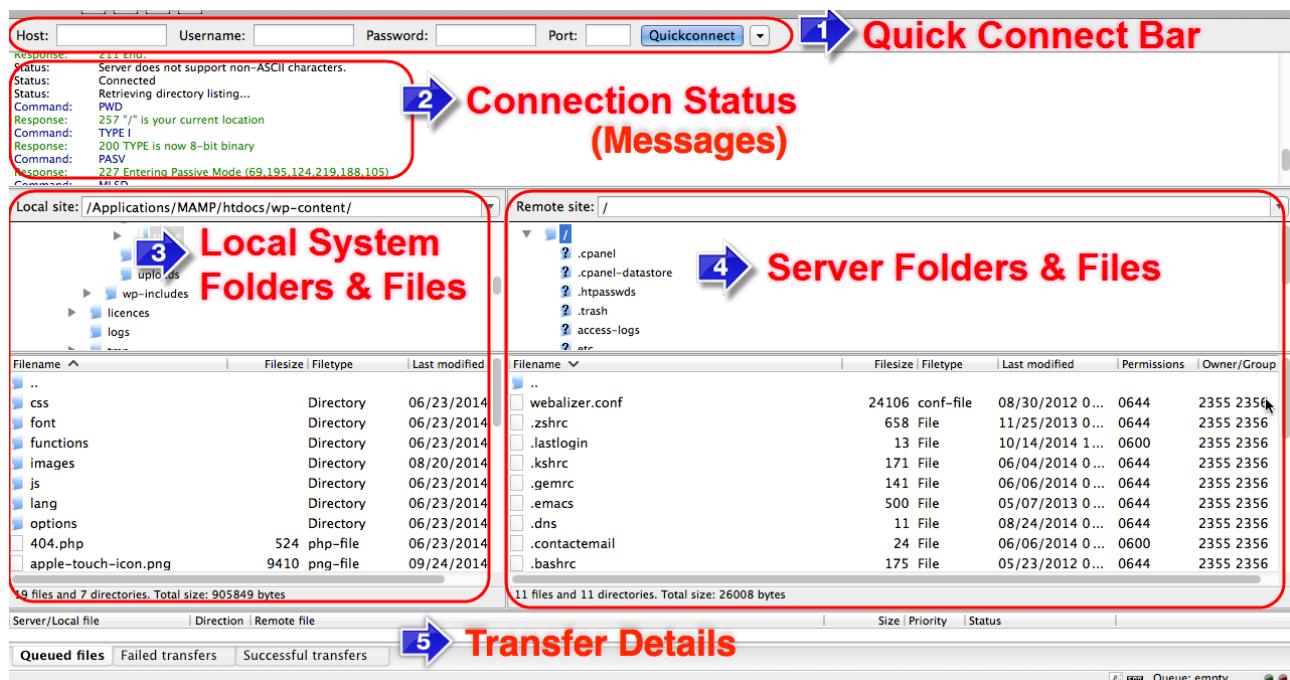

Deploy/Install Manual

For User

Our system is very easy to use because this is a web application. If you want to use our system for learning some arts or sharing some course about arts, you do not need to do complex process for use it. You just need to have internet connection and one of web browsers. If you have both of them, you can enter our system with a link.

For Developer

Our system is a web project. For this reason, if you want to deploy our system, first of all you need to have a hosting. If you already rented one, you can upload your files for using the system. To do this, you can use some utilities such as FileZilla. This program will ask you for some information. These are Server, Username and Password information for login the hosting. After you logged in the system, you should open file location in your local system. After that you can select the files and upload them by drag and drop method. Finally, you can use the system. You can see these steps on the follows figure.

What are the main features of the system?

This system helps people who want to have a hobby and who want to share their knowledge. You can ask what types of hobby. These are about art such as dance, painting, etc. The system is not complex to use. You need to have an account, and need to select a course from our system, but if the course is paid course, you have to pay. Eventually, you can learn what you want.

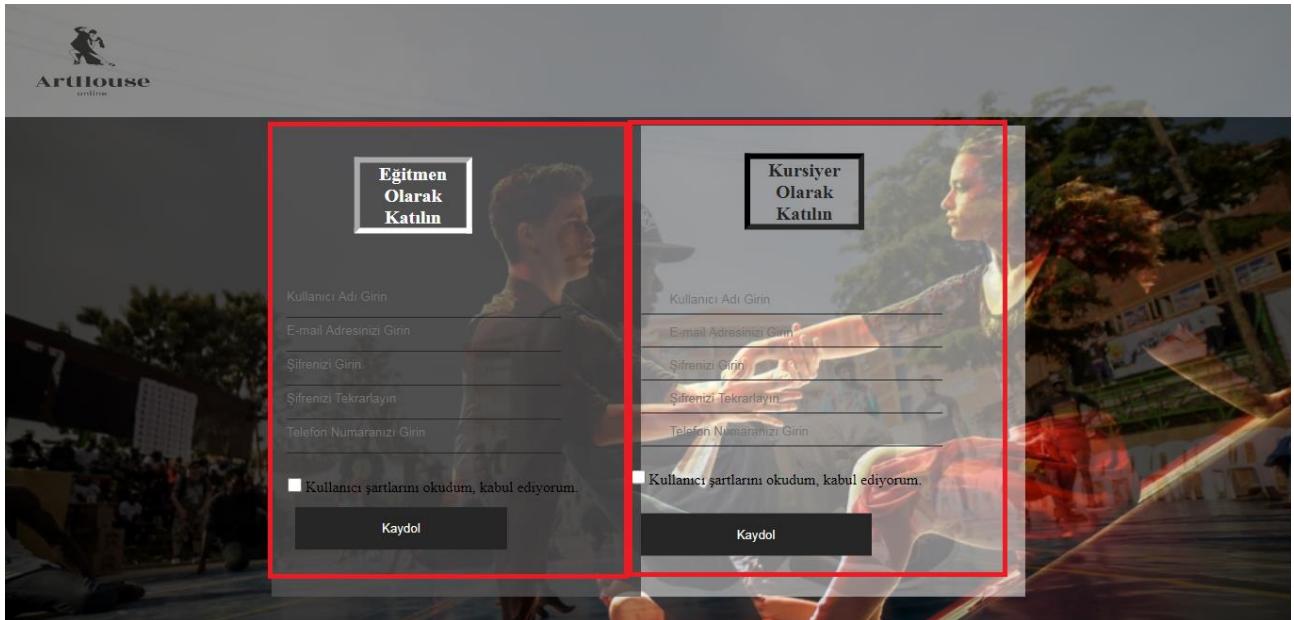

Main and Additional Scenarios

As examples of scenarios, create account, log in and take the course can be given. They are the most important because you can use the system generally with them.

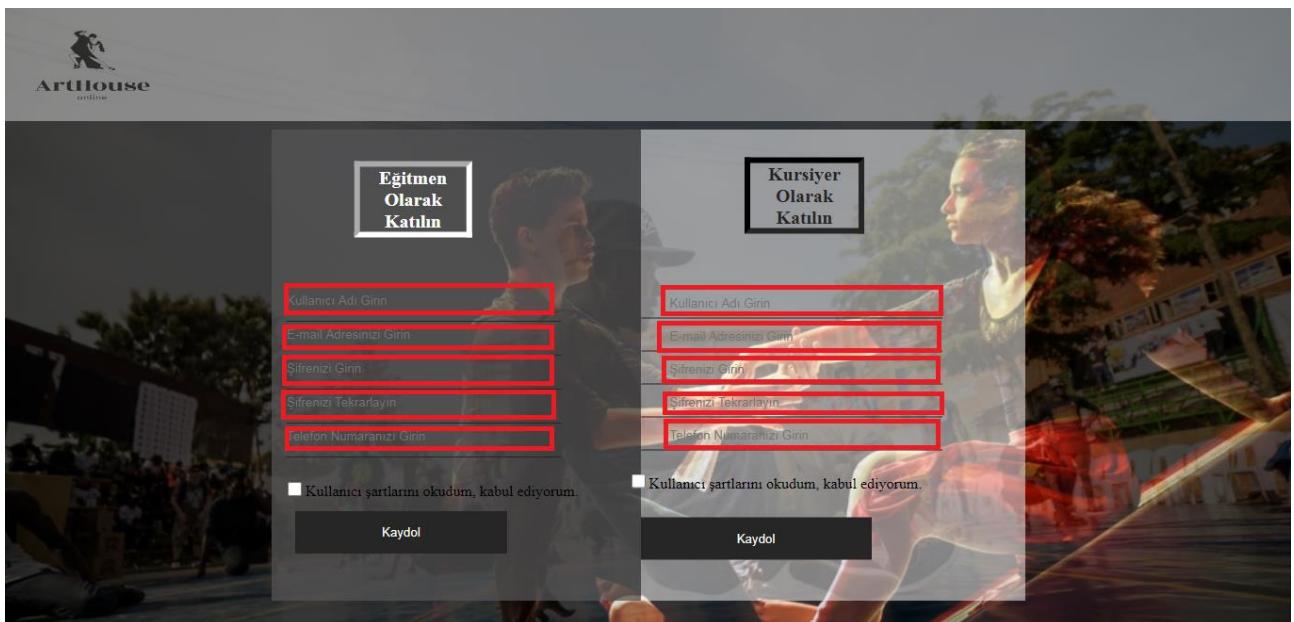

For the create account scenario, First of all you need to open our link with the web browsers that what you use. On the page that you opened you will see a menu. Click the “AİLEMİZE KATILIN” menu.

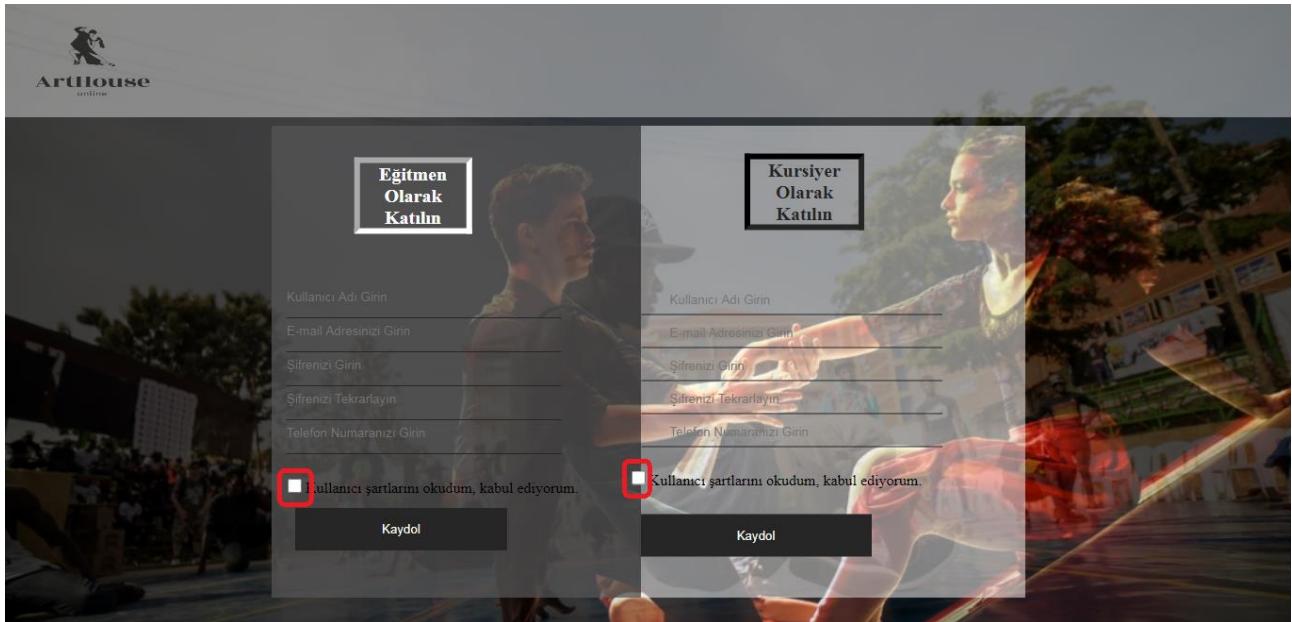

After that you will see two types in the system because there are two types of users. If you want to learn something about arts, you can use “Kursiyer Olarak Katılın” panel. If you want to share something about arts, you can use “Eğitmen Olarak Katılın” panel.

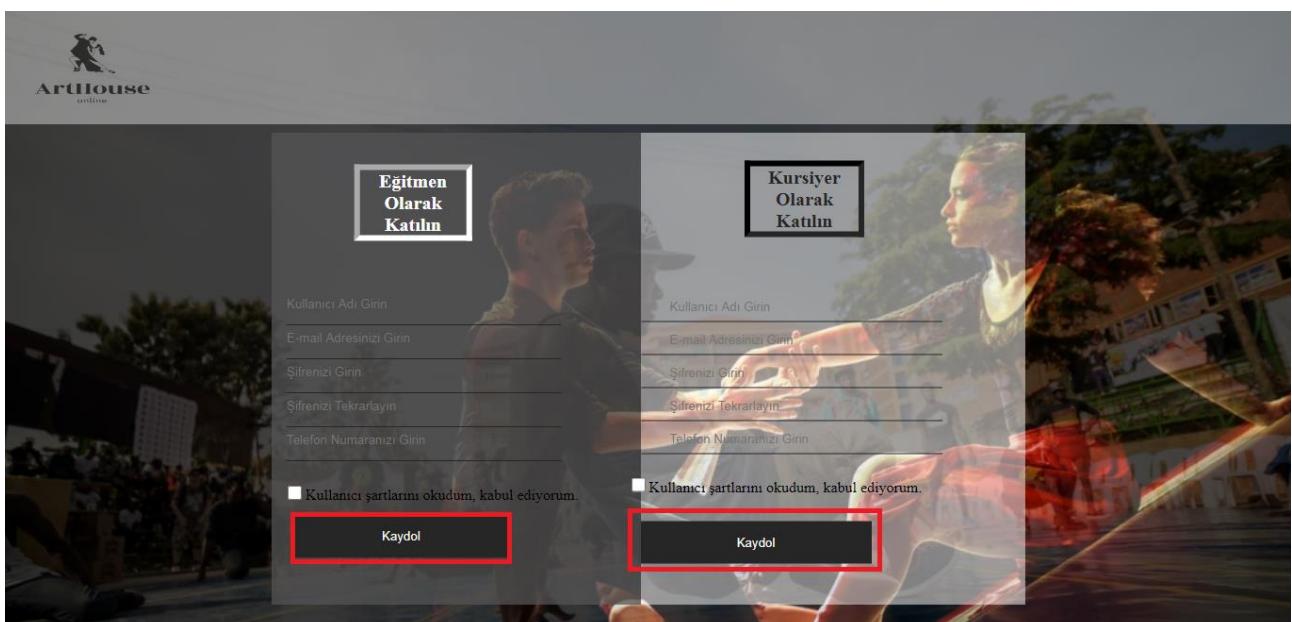

There are five inputs for both of them. They are “Kullanıcı Adı Girin”, “E-mail Adresinizi Girin”, “Şifrenizi Girin”, “Şifrenizi tekrar girin” and “Telefon Numaranızı Girin”. These inputs are “Enter username”, “Enter E-mail address”, “Enter password”, “Re-enter password” and “Enter phone number” respectively. You should fill them.

Then, accept the terms of use.

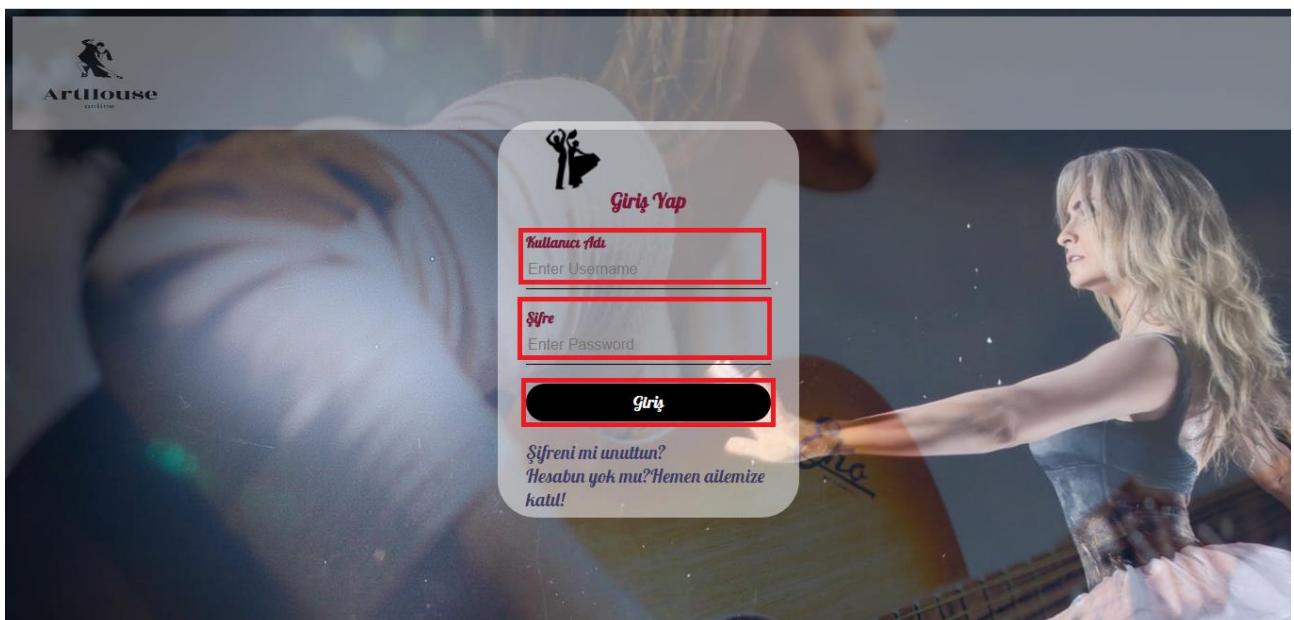

After that press the “Kaydol” button. This is sign up button. Eventually, you have an account in the system.

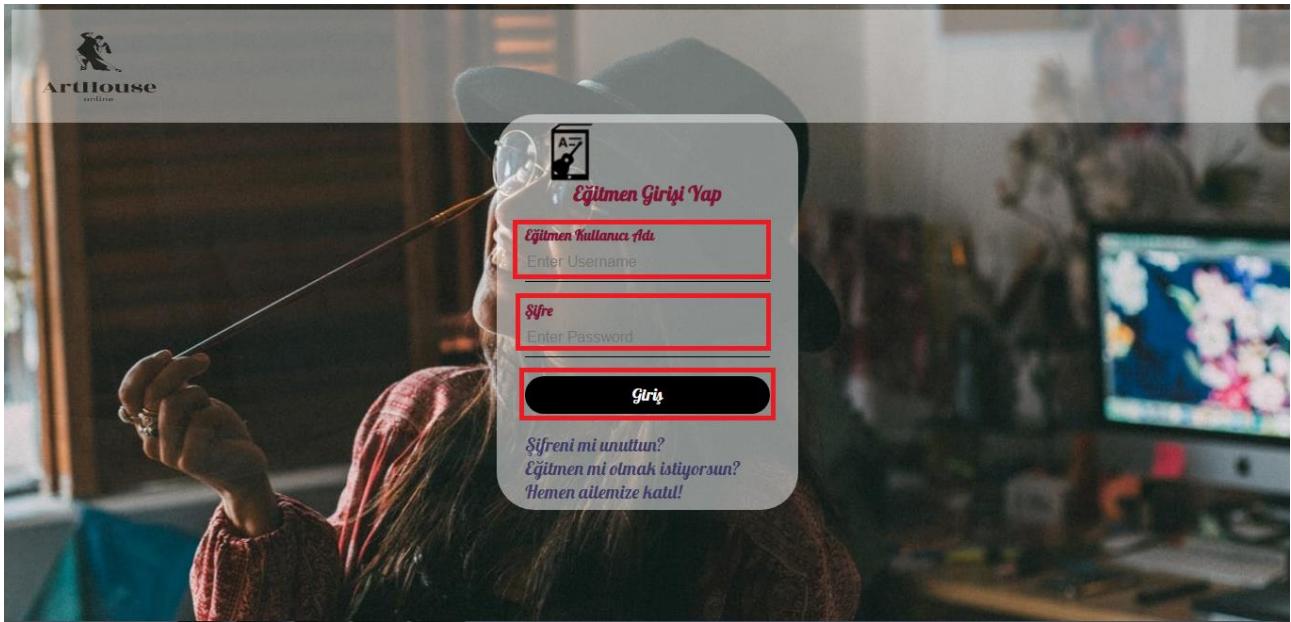

For log in scenario, you need to have an account such as student or instructor. If you have, open system page via one of browsers. When the page load, you can see the menu above. If you are a student, you can press “KURSİYER GİRİŞİ”. If you are an instructor, you can click “EĞİTMEN GİRİŞİ”.

You can see the same inputs for both of them. They are “Enter username” and “Enter Password”. You need to fill them with your information. Then, press “Giriş” button. This is “log in” button.
